REVEAL THE YOUNGER-LOOKING YOU!

WHAT DO SOFWAVE™ CLIENTS THINK?

"I have noticed a significant and profound difference with Sofwave™, and I'm continuing to."

Candice Barley, Sofwave™ Patient

"When I had my Sofwave™ done, I was able to go right back into my normal life, to the gym, and I met up with friends. The Sofwave™ treatment felt modern, it kind of is this magic treatment! It's my secret weapon."

Paul Norton, Sofwave™ Patient

sofwave™

Sofwave's breakthrough technology harnesses the power of ultrasound to stimulate the production of collagen, elastin, and hyaluronic acid non-invasively to improve skin laxity, lift, and give you younger-looking skin without surgery, needles, downtime, or aftercare.

Sofwave's technology is FDA-cleared for:

- **Improving** fine lines & wrinkles
- **Lifting** the eyebrow, neck & submental
- **Treating** acne scars
- **Improving*** the appearance of cellulite

SOFWAVE™ IS THE WINNER OF:

ELLE FUTURE OF BEAUTY WINNER 2021 · AWARD WINNER 2022 NEWBEAUTY · HOLY GRAIL COSMOPOLITAN BEAUTY AWARD 2021 · 2022 WINNER SHAPE SKIN AWARD · WINNER · AWARD WINNER 2023 NEWBEAUTY · BEST BEAUTY 2023 GOOD HOUSEKEEPING AWARDS

AM I GOOD CANDIDATE?

Good candidates for Sofwave™ is typically those with mild to moderate skin aging. This unique technology is suitable for all skin types and tones! We further recommend asking your provider if the Sofwave™ treatment is right for you.

ARE THERE ANY SIDE EFFECTS ASSOCIATED WITH SOFWAVE™?

Sofwave™ is designed to minimize downtime and optimize patient convenience:

- No bruising was reported during clinical testing.
- No penetration of the skin is required.
- No device-related adverse events were reported in the multi-center clinical studies.
- None of the patients experienced persistent pain or tenderness that would delay a return to normal activities.

How many treatments does it take?

With Sofwave™, most patients only need one treatment. Some may benefit from an additional treatment, depending on their body's physiological response.

What does the Sofwave™ treatment feel like?

Patients may feel a warm sensation on their skin as the ultrasound energy is delivered, which can be resolved by applying a topical anesthetic cream just before the treatment. Following treatment, there are no sensations, and there is no need to apply special care to the skin. Patients may resume their daily activities quickly post-treatment.

How long is the treatment?

A complete treatment can take as little as 30-45 minutes. Patients love that they can fit Sofwave™ into their active lifestyle at any time and season.

How long does it take to see results, and how long do they last?

Some patients have reported seeing immediate results as soon as 1 week following the treatment. The natural skin regeneration process can sometimes take up to 12 weeks, so patients are expected to see ongoing improvements during this period. Sofwave's clinical evidence shows a significant effect up to one year following a single treatment.

What were Sofwave's clinical results?

The acne scars clinical study results were extremely high:

- 97% have improved their acne scars appearance per blinded evaluation.
- 88% of the subjects have reported an improvement in their acne scars appearance.
- 46% improvement level based on Acne Scars Severity grading.

How many treatments are needed, and how frequent?

The number of sessions depends on multiple factors, such as the doctor's preferences and recommendations, genetics, age, skin condition, nutrition, and lifestyle. The recommended number of sessions for treating acne scars is 1-3 treatments, spaced 4-8 weeks apart

How does Sofwave™ work to treat cellulite??

Sofwave™ uses ultrasound energy to heat the dermis, the middle layer of skin where collagen and elastin fibers are produced. The healing process that follows the thermal effect stimulates the growth of elastin and collagen fibers. This, in turn, lifts the skin and improves wrinkles, facial lines, and skin laxity, which all lead to an improvement in the appearance of cellulite.

How quickly can Sofwave™ improve the appearance of cellulite?

Some patients may see results already 4-6 weeks post the first treatment, while others will need two treatments. Ask your provider if the Sofwave™ procedure is suitable for you.
